ENDOSPHERES® ESSENZA. INNOVATION AND PROFITABILITY

Endospheres® Essenza is a non-invasive aesthetic technology designed to deliver **visible results**, **support client loyalty**, and **strengthen business performance**.

In aesthetics, results and usability make the difference.
Endospheres® Essenza combines high performance with intuitive operation, creating a solution that fits seamlessly into daily practice.

Powered by Endospheres' patented technology, it delivers the benefits of **Compressive Microvibration®** in an optimized format that enhances the operator experience and supports **return on investment**.

This is not about being more advanced, it is about being effective, reliable, and profitable.

ECLIPSE IMPERIAL BLUSH

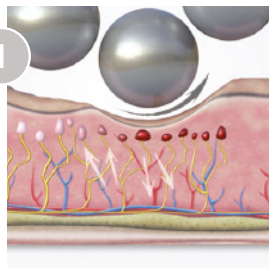
COMPRESSIVE MICROVIBRATION®

Endospheres® is the only patented technology that uses **Compressive Microvibration®**.

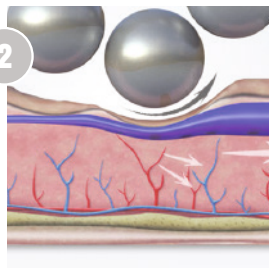
The sinusoidal wave generated by the mechanical movement of the spheres works deeply, from the dermis to the muscle.

Studies and observations confirm the effectiveness of Endospheres® in visibly improving skin quality and overall body well-being.

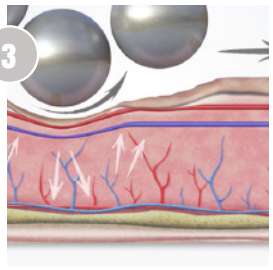
5 COMBINED ACTIONS



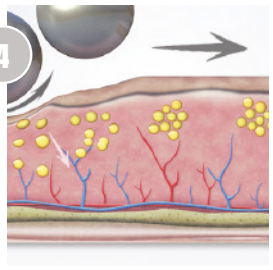
PROVIDES
temporary relief from muscle pain



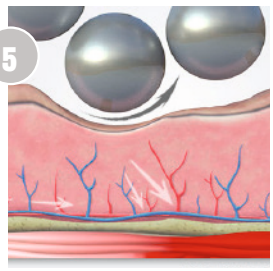
IMPROVES
leg comfort by reducing the feeling of swelling



SUPPORTS
microcirculation and promotes tissue oxygenation



GENTLY STIMULATES
the skin for a smoother, revitalised appearance



PROMOTES
an overall sense of relaxation and well-being

endoSPHERES®

PATENTED TECHNOLOGY | **100%** MADE IN ITALY

ENDOSPHERES SENSOR SYSTEM SECOND-GENERATION TECHNOLOGY

The **Endospheres® Essenza** handpiece is equipped with a sensor system that optimizes treatment by **adapting it in real-time to the skin's needs**.

This system is managed by an algorithm that ensures maximum precision and control.

BOOST FUNCTION

The Boost function **analyzes** tissue resistance in real-time, detects fibrotic areas, and **automatically adjusts the frequency**, increasing it by up to **40%**. The treatment fully adapts to specific needs, ensuring maximum effectiveness.

+ **Intelligent and automatic adjustment**
Delivers consistently effective treatments without the need for manual adjustments.

+ **Faster and more precise treatments**
Ensures uniform action, reduces treatment time, and optimizes results in targeted areas.

+ **Enhanced comfort for both you and your client**
The calibrated action prevents excessive pressure, making the treatment pleasant, safe, and effortless for the operator.

endoSPHERES®

13 WORKING STEPS

The 13 steps are pre-set work programs that guide each phase of the execution protocol, ensuring **precision**, **effectiveness**, and **safety**.

Each session corresponds to a program designed to provide maximum reliability and results. The session sensitivity is calibrated to support the operator in treating different types of tissue.

Efficiency, visible results, and total control in every session.

THE SPHERES

The spheres are designed for effectiveness, safety, and comfort. Made with **cutting-edge materials**, they ensure a superior treatment experience while being gentle on both the skin and the environment.

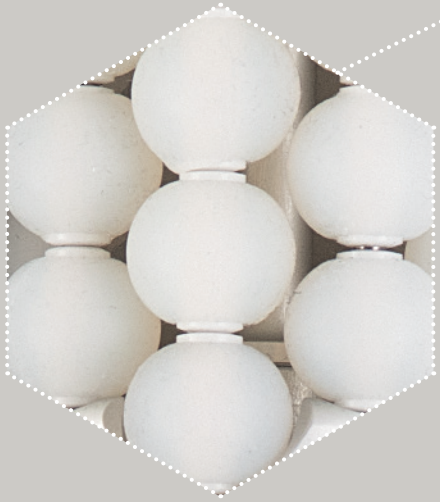
Engineered for long-lasting performance without compromising results, they deliver optimal outcomes in every session. Innovation is not just about technology, it's about quality and sustainability.

2 ROTORS

With Essenza, the two included rotors are designed to work in synergy, providing a versatile and effective treatment. This dual technology enables the customization of each session, tailoring each treatment to the individual needs while enhancing comfort and overall well-being.

15 SH GEL SPHERES
Designed for a gentle, soothing experience, ensuring uniform and controlled contact.

35 SH HYPOALLERGENIC SILICONE SPHERES
Engineered for a more targeted and deeper action, while maintaining comfort and stability during the treatment.



Honeycomb arrangement
Designed to generate optimal vibration.

Sustainable and safe materials:

+ Recyclable, compostable, and biodegradable
+ Durable and biocompatible
+ Sanitizable without degradation

INERTIAL PLATFORM.
INTELLIGENCE BEHIND EVERY MOVEMENT

The inertial platform is an **advanced technology** integrated into the Endospheres Essenza handpiece. It is designed to provide the operator with real-time information on the handpiece's position during treatment.

It detects orientation, skin contact, and inclination, translating complex data into clear, immediate, and practical guidance.

The result is a smoother, more controlled movement.
This function works alongside the operator, enhancing manual skill and making every gesture more precise and harmonious. It is like having an **invisible assistant** accompanying the treatment, suggesting the most effective setup at every moment.

This allows the operator to focus on the protocol, on listening to the body, and on the relationship with the client, without constantly questioning the position of the handpiece.

For professionals, it means greater operational confidence.
For clients, it means more uniform, consistent, and reliable results.

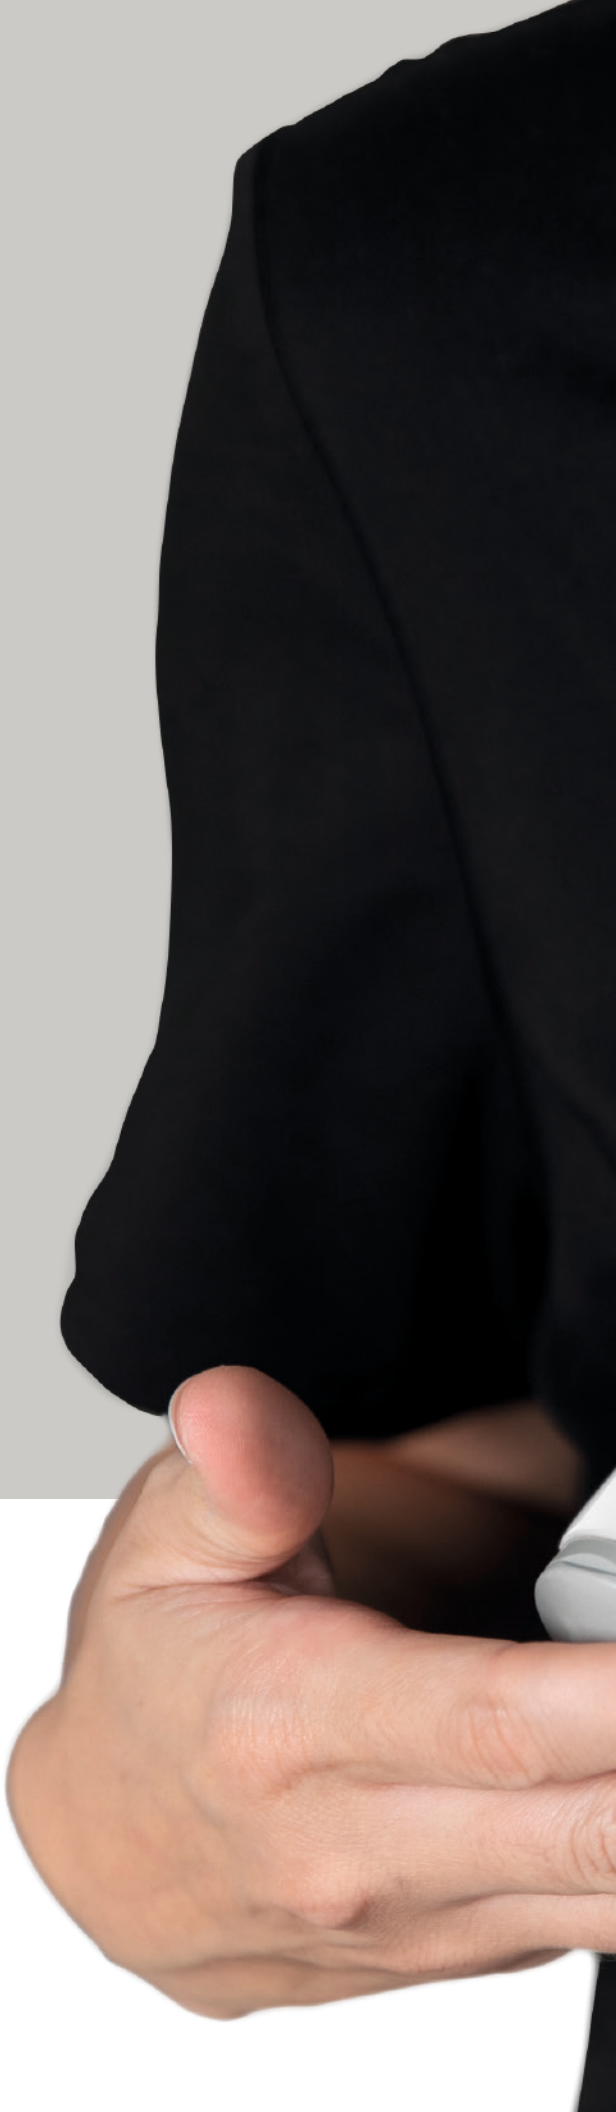
+ **Intuitive display**
+ **Real-time parameter monitoring**
+ **Instant control**

FACIAL HANDPIECE

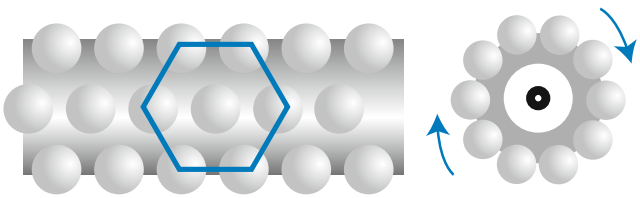
Endospheres Essenza includes a dedicated facial handpiece, equipped with 15 SH gel spheres, designed to work **gently and in a controlled manner** on the most sensitive tissues.

The technology applied is the same **Compressive Microvibration®** system, adapted for more precise and localised action. This makes it ideal for pro-aging protocols and for maintaining tissue quality over time.

The same handpiece is also used in advanced body protocols when treatment is required on specific and delicate areas according to the techniques learned during dedicated training courses.



15 SH GEL SPHERES



Honeycomb configuration
for precise and delicate action.

Sustainable and safe materials:

+ Biocompatible gel spheres.
+ Designed for sanitation after each cycle.
+ Stable and durable.

REAR-MOUNTED HANDPIECES. MORE SPACE WHERE IT MATTERS.

In Endospheres Essenza, the handpieces have been repositioned and moved to the rear of the device. This choice clears the front surface and makes room for a larger display.

All software functions are now visible at a glance and easy to consult during treatment.
The operator works with continuity, without pauses or distractions.

Handpiece access is **intuitive**. Pick up and return feel natural and fluid, with no break in rhythm and no loss of focus on the client.

The result is a **clearer interface** and a more **essential, streamlined design**.

INTEGRATED VIDEO PROTOCOLS. TRAINING, ALWAYS AT HAND.

In Endospheres Essenza, **treatment protocols** are built directly into the software as on-screen videos, available at any time on the device. The operator can review sequences, techniques, and handpiece use without interrupting the treatment or turning to external materials.

This offers real, day-to-day support. Video protocols help keep every session aligned with the scientific method that ensures consistency and reliable outcomes.

The result is a clear point of reference, greater confidence in execution, and continuous reinforcement of what was learned during in-person training.

Over time, this continuity of method translates into treatments performed correctly and delivered with consistent quality.
