endoSPHERES®

IS THE PERFECT NUMBER

Evolution represents the third generation of Endospheres®.

Every component is designed to enhance and optimize treatment performance.

The new design is elegant and sophisticated.

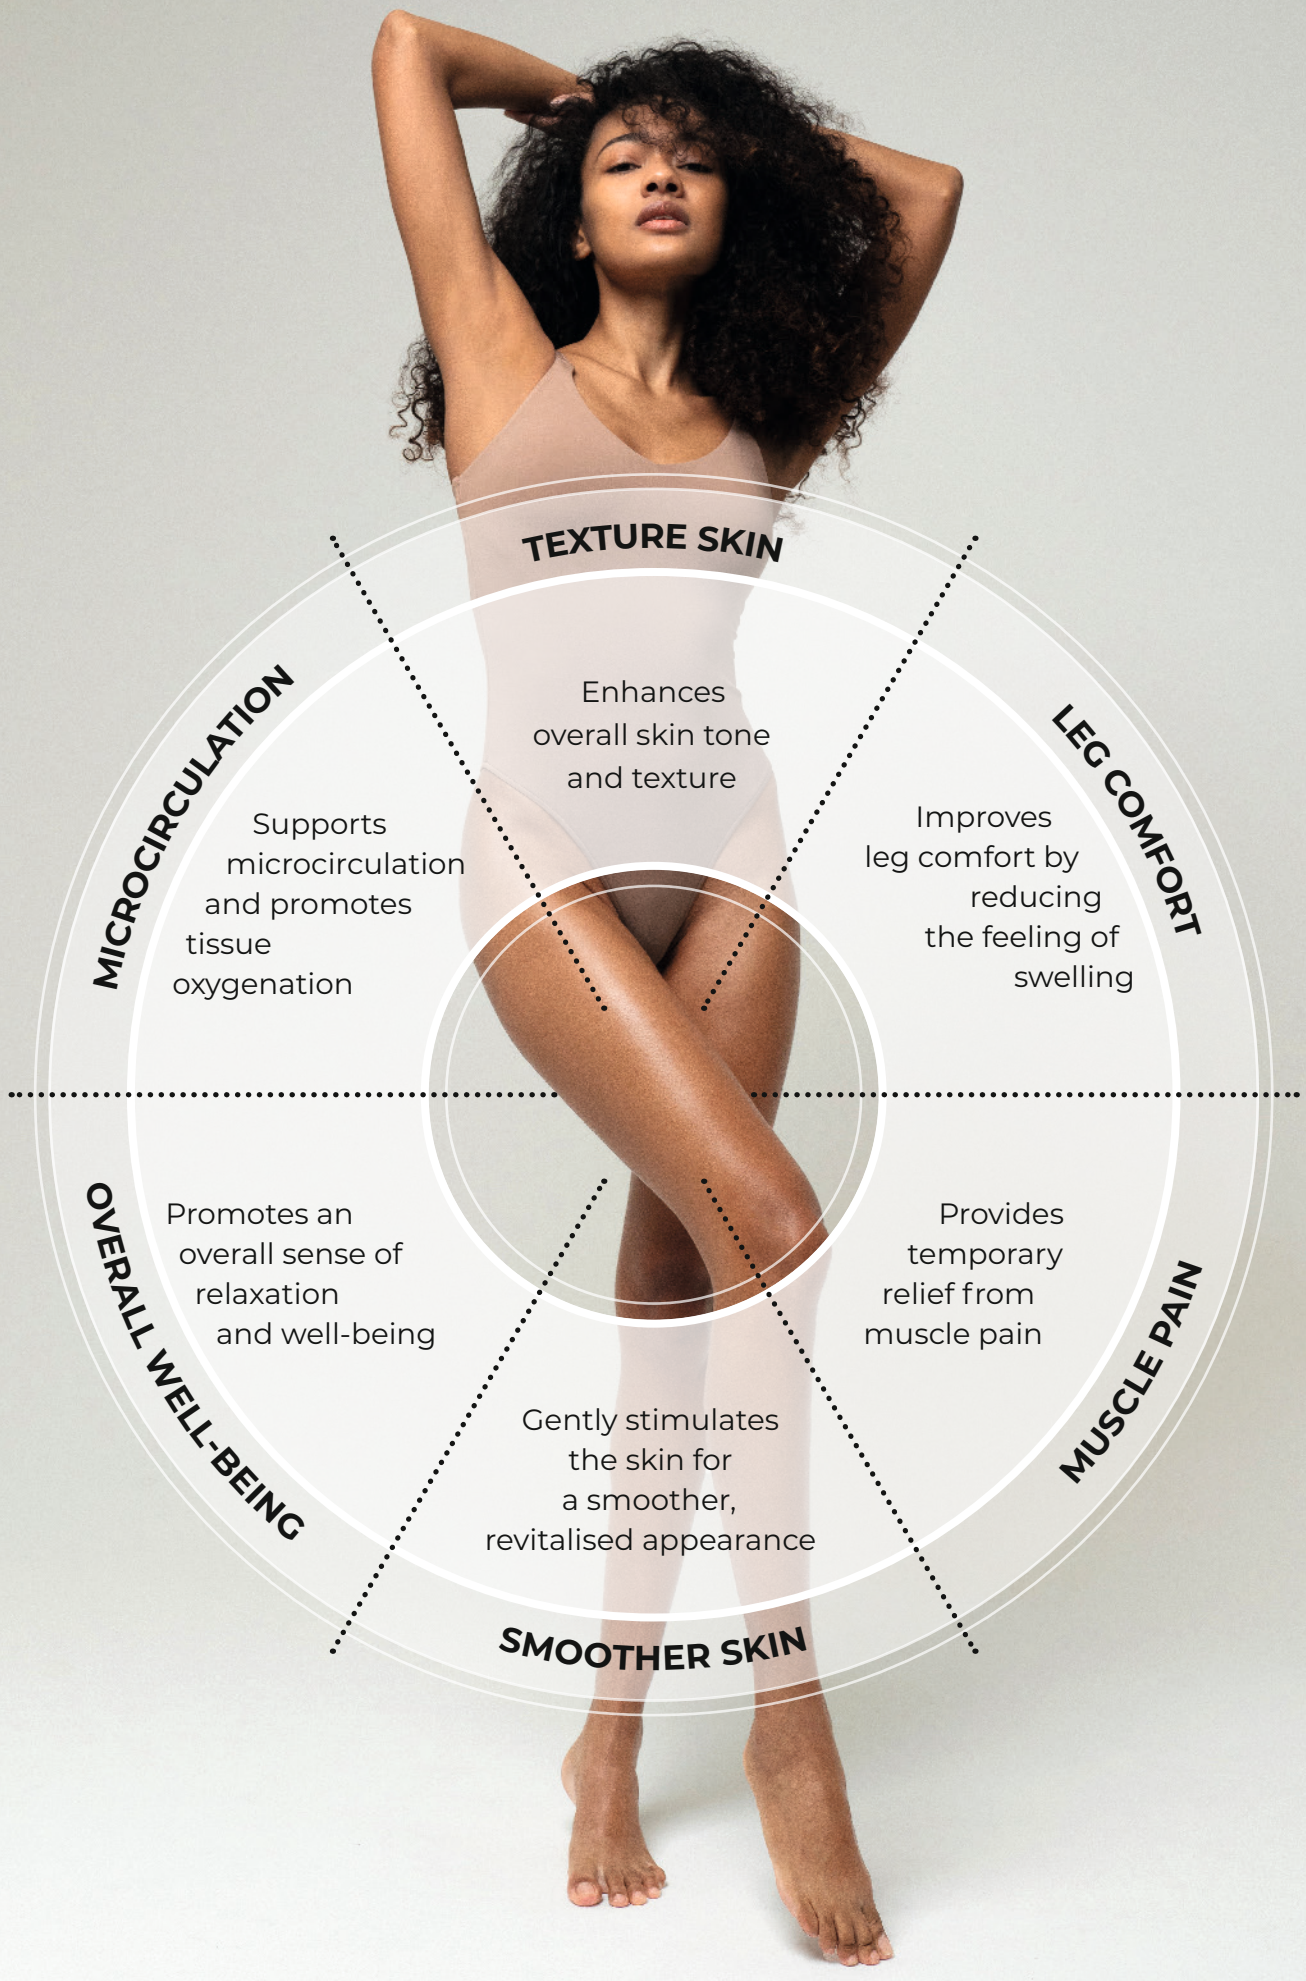

OUR UNIQUE TECHNOLOGY

Endospheres® is the only patented technology that uses **Compressive Microvibration**®.
The handpiece, with **55 moving spheres**, generates a sinusoidal wave through their mechanical movement.
This sinusoidal wave works deeply, from the dermis to the muscle layer.

Studies and tests confirm the effectiveness of Endospheres® in visibly improving skin quality and overall body well-being.

100% NON-INVASIVE

MADE IN ITALY

TEXTURE SKIN
Enhances overall skin tone and texture
LEG COMFORT
Improves leg comfort by reducing the feeling of swelling
MUSCLE PAIN
Provides temporary relief from muscle pain
SMOOTHER SKIN
Gently stimulates the skin for a smoother, revitalised appearance
OVERALL WELL-BEING
Promotes an overall sense of relaxation and well-being
MICROCIRCULATION
Supports microcirculation and promotes tissue oxygenation

The data presented is based on scientific studies conducted on Endospheres. Results may vary depending on individual characteristics and treatment consistency.

THE IDEAL TREATMENT

The new body treatment handpiece features an **innovative and functional design**. The display, positioned on the back, provides the operator with **real-time treatment data**.

3 ROTORS

Evolution is equipped with three rotors designed to work in synergy, delivering a comprehensive and highly customizable treatment. This configuration optimizes effects on toning, drainage, and reshaping. Thanks to this advanced technology, each session is tailored to specific needs, ensuring visible and long-lasting results.

15 SH Gel Spheres
Deliver a gentle yet effective mechanical action that enhances comfort and promotes a light, refreshed feeling in the treated area.

35 SH Hypoallergenic Silicone Spheres
Provide deeper stimulation to enhance skin firmness and improve the visible appearance of tone and texture.

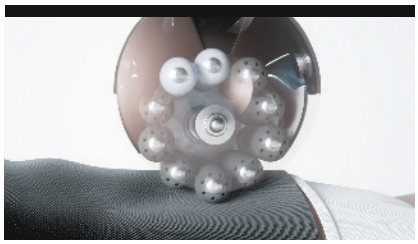

VD-Tech Rotor – Rigid and Variable Density Spheres
Engineered for intensive action on stubborn areas of concern, helping refine body contours.

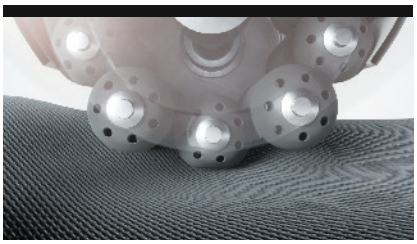

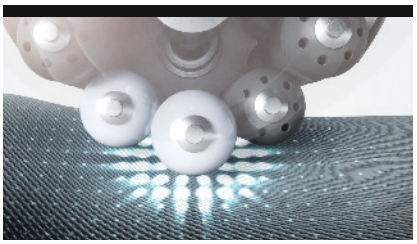

VD-TECH ROTOR.

HOW DOES IT WORK?

The core of this system lies in the **structure of the sphere**, which **undergoes a controlled deformation** under a specific level of pressure. This enhances the action of the rigid spheres, generating a **hyperwave**. This process **increases tissue compression**, delivering **mechanical stimulation** to targeted areas.

ENDOSPHERES SENSOR SYSTEM SECOND-GENERATION TECHNOLOGY

The Endospheres® Evolution handpiece is equipped with a sensor system that optimizes treatment by adapting it in real-time to the skin's needs.

This system is managed by an algorithm that ensures maximum precision and control.

BOOST FUNCTION

The Boost function analyzes tissue resistance in real-time, detects fibrotic areas, and automatically adjusts the frequency, increasing it by up to 40%. The treatment fully adapts to specific needs, ensuring maximum effectiveness.

Intelligent and automatic adjustment

Delivers consistently effective treatments without the need for manual adjustments.

Faster and more precise treatments

Ensures uniform action, reduces treatment time, and optimizes results in targeted areas.

Enhanced comfort for both you and your client

The calibrated action prevents excessive pressure, making the treatment pleasant, safe, and effortless for the operator.

13 WORKING STEPS

The 13 steps are pre-set work programs that guide each phase of the execution protocol, ensuring precision, effectiveness, and safety.

Each session corresponds to a program designed to provide maximum reliability and results. The session sensitivity is calibrated to support the operator in treating different types of tissue.

Efficiency, visible results, and total control in every session.

THE EVOLUTION HANDPIECE

The Evolution handpiece has been meticulously designed to ensure an optimal treatment experience. Every component has been carefully calibrated in terms of weight and size for maximum efficiency.

EASY MAINTENANCE

Maintenance is quick and simple. Its components are designed for easy disassembly and hygienic cleaning.

SAFETY & DURABILITY

A motor cooling system and certified materials ensure long-term safety and durability.

SHAPE TRADEMARK

The Endospheres® Evolution handpiece is not just a tool. It is a signature. Its distinctive design is protected as a registered shape trademark, confirming its authenticity and origin. Every curve reflects patented engineering, every detail signals original technology. For professionals, this means certainty: you are working with the true device, designed and made by the creators of the method, delivering recognizable performance clients can feel and trust from the start.

FENIX

HONEYCOMB SPHERE ARRANGEMENT

The spheres are designed with a specific diameter to form a honeycomb geometry.

This configuration enables the generation of Compressive Microvibration®, a technique that produces a series of sinusoidal waves acting on the tissues.

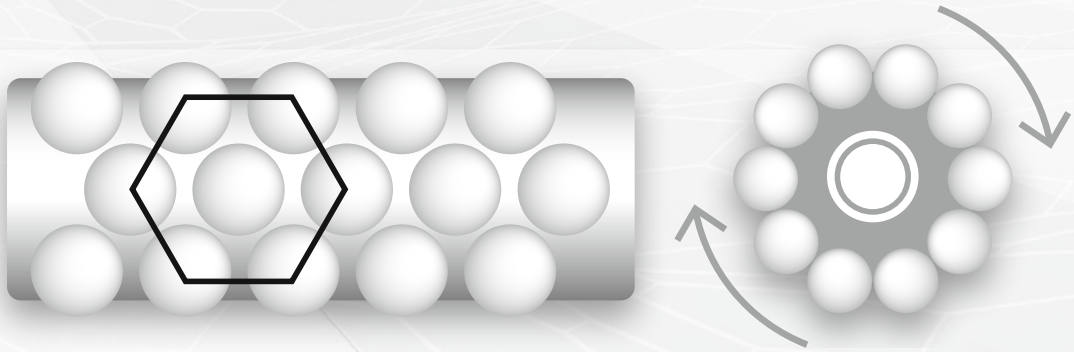

The spheres used in the Evolution handpiece are made from sustainable materials.

Key Features of the Spheres:

Recyclable, compostable, biodegradable, durable, and reusable

These spheres are **biocompatible**, meaning they are safe for the skin, non-irritating, and suitable for use on various parts of the body.

They can be sanitized without degrading, ensuring long-lasting durability while maintaining high cleanliness standards.

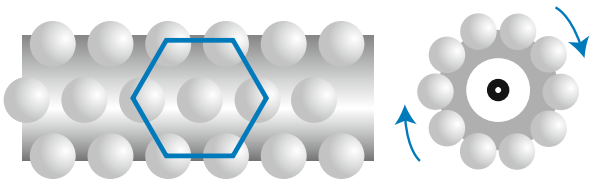

THE FACIAL HANDPIECE

Endospheres Evolution includes a dedicated facial handpiece, equipped with **15 SH gel spheres**, designed to work **gently and in a controlled manner** on the most sensitive tissues.

The technology applied is the same **Compressive Microvibration**® system, adapted for more precise and localised action. This makes it ideal for pro-aging protocols and for maintaining tissue quality over time.

The same handpiece is also used in advanced body protocols when treatment is required on specific and delicate area according to the techniques learned during dedicated training courses.

HONEYCOMB CONFIGURATION

For precise and delicate action.

- **Biocompatible** gel spheres.
- **Designed** for sanitation after each cycle.
- Stable and **durable**.

SUSTAINABLE AND SAFE MATERIALS

The data presented is based on scientific studies conducted on Endospheres. Results may vary depending on individual characteristics and treatment consistency.

HI-TECH SYSTEM

11” ULTRA HD TOUCH SCREEN DISPLAY

For an easy, fast, and intuitive user experience.

MONITORING

The system allows the operator to monitor their work and that of their employees at any time, thanks to a graph that simultaneously compares their execution mode with the ideal one.

CLIENT DATA ACQUISITION

The operator can record client data (age, weight, height, morphology...) for a comprehensive assessment and to track their progressive improvements.

CONNECTIVITY

Evolution is always connected to detect and install updates directly on the device.

ONLINE SUPPORT

The operator can request assistance, allowing our technicians to remotely access and service the device.

ENDOTHERMAL CAMERA

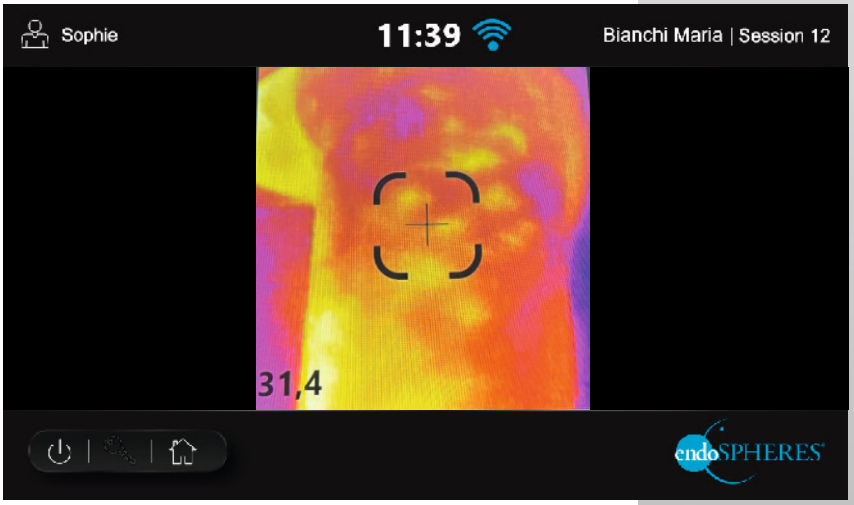

Endospheres® Evolution enables precise client assessment and progress monitoring through its **thermal imaging system**, which integrates two advanced technologies into a single system.

The device features a high-resolution thermographic sensor that detects thermal variations in a single image, highlighting differences using distinct colors. This image is displayed directly on the Evolution screen, making it easier for the operator to analyze.

Additionally, the same handpiece is equipped with a **high-resolution camera** for visual tissue analysis.

This image is also displayed on the screen, allowing for a detailed evaluation of the treated area.

The software enables image overlay and comparison, providing a comprehensive analysis of treatment results.

INTEGRATED VIDEO PROTOCOL GUIDE

With Evolution, the operator has access to all treatment video protocols, which not only demonstrate the techniques but also provide guidelines on pressure, frequency, and application times.

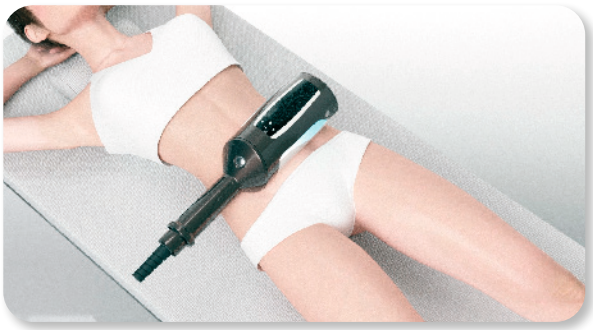

This offers real, day-to-day support.

Video protocols help keep every session aligned with the scientific method that ensures consistency and reliable outcomes.

These videos are available in two formats:

- **Individual technique clips**,
  accessible on demand during the treatment;
- **A full-length training video**,
  covering the entire treatment process.
